

STEPS TO VOICING YOUR OWN AUDIOBOOK

1. Set a Goal

When do you plan to release your audiobook?

Set a timeline to record and edit based on that deadline.

2. Assistance

Plan to hire someone to assist in the recording process and prepare audio based on ACX specs.

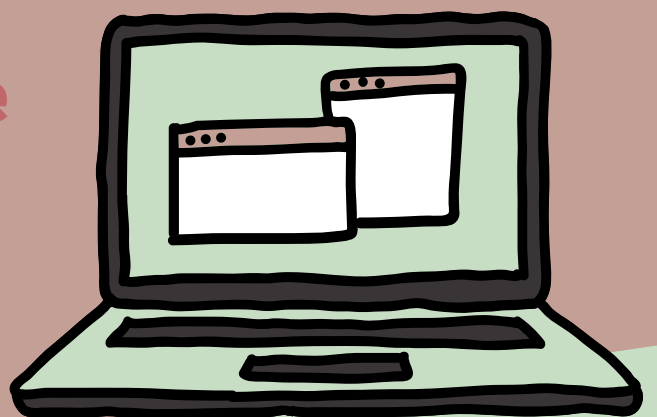

3. Equipment

You'll need a mic, pop filter, headphones, and a Digital Audio Workstation. (Audacity is free!)

4. Set up Your Space

Set up your recording space somewhere quiet. Test out and get used to your equipment.

5. Record!

Have fun recording! If you make mistakes, don't stop - just restart the sentence and keep going!
